Operational work of SIC in 2015

Reforms in the insurance sector and secondary securities market

WG on development of national industry and agriculture monitored, coordinated and technically assisted

National Rating of Investment Climate established

October 14 proclaimed as the National Day of Entrepreneurs

National and Regional PPD developed

More systematic approach to private sector

Continuous analysis on identifying obstacles, barriers, agents, drivers of improvement of investment and business climate

Sector specific PPD promoted (agriculture, mining, construction and etc.)

Capacity building for personnel, introduction of monitoring tools and other best practices in daily operation of SIC

Thank you for attention!

**Reforms
within
PPD
platform**

Complementarity between PPD at national and local level

- **enable private sector participation in consultations and decision making process** (filter, work groups, joint M&E)
- **consistency of proposed reforms** (interests of private sector vs. local and national strategic plans)
- **channel up reform recommendations to national level** (bottom up approach)
- **learning and development by PPD stakeholders** (info, visits)
- **inclusive M&E system** (reforms and PPD stakeholders)
- **ratification of national reforms and centralized monitoring of implementation at local level** (top down approach).
Subsequent removal of barriers (admin and legal) and impact on increased investments (foreign and local)
